
PRODUCT DESCRIPTION

H₂S-N is a concentrated H₂S neutralization agent commonly used to reduce H₂S in well test and flow back fluids during offshore well testing operations.

RECOMMENDED APPLICATION

H₂S-N is injected in the flow stream of well test separator units to neutralize the H₂S prior to discharge of fluids and gas, overboard or to the burner.

COMPATIBILITY

H₂S-N is a liquid H₂S neutralizer that can be injected with most chemical injection pump systems.

TYPICAL PHYSICAL PROPERTIES

Form:	Liquid
Chemical Family:	Amine
Color:	Colorless to yellow
Solubility:	Water
Odor:	Ammonia
Wt. per Gal.:	9.13 lbs.
Charge:	NA
Flash Point:	>200 ⁰ F (93.3 ⁰ C)

HANDLING/STORAGE

H₂S-N is a non-regulated liquid. Keep drum tightly sealed to prevent evaporation and contamination. Refer to the Material Safety Data Sheet (MSDS) for handling and hazard data.

PACKAGING

H₂S-N is available in 55 gallon poly drums.
