

---

## **PRODUCT DESCRIPTION**

PS-104 is a straw colored liquid used to scavenge oxygen and inhibit calcium sulfate, barium sulfate and calcium carbonate scales in injection and produced water.

---

## **RECOMMENDED APPLICATION**

PS-104 is normally continuously injected into injection water at 10 – 100 ppm of total produced hydrocarbons.

---

## **COMPATIBILITY**

PS-104 is incompatible with oil in container.  
No incompatibility with produced oil in system.

---

## **TYPICAL PHYSICAL PROPERTIES**

Form:	Liquid
Chemical Family:	Sulfate Chelant in Water
Color:	Colorless
Solubility:	Water, Brines
Odor:	Ammonia
Wt. per Gal.:	9.26 lbs.
Charge:	Anionic
Flash Point:	>200 <sup>0</sup> F (93.3°C)

---

## **HANDLING/STORAGE**

Store in original container and keep tightly closed after opening. Refer to Material Safety Data Sheet (MSDS) for handling and hazard data.

---

## **PACKAGING**

PS-104 is shipped in 55 gallon poly drums.
