
PRODUCT DESCRIPTION

SP-1100 is a product which is formulated for application by atomization into a gas line prior to the sales point for removal of CO₂ from the sales gas.

SP-1100 is a unique product which will remove CO₂ from produced gas by continuous injection. It provides an easy method to remove CO₂ from produced gas to allow the gas to be sold.

RECOMMENDED APPLICATION

SP-1100 may be applied by a chemical pump injection system. This product will remove up to 10% CO₂ from produced gas prior to the sales line.

COMPATIBILITY

SP-1100 is a water soluble product with a basic pH and would react if placed in contact with an acidic product.

TYPICAL PHYSICAL PROPERTIES

Form:	Liquid
Chemical Family:	Blend
Color:	Colorless
Solubility:	Water, Brines
Odor:	Mild
Wt. per Gal.:	8.5 lbs.
Charge:	NA
Flash Point:	>200 ⁰ F (93.3°C)

HANDLING/STORAGE

SP-1100 is a very high pH product which should not be stored close to acidic or low PH products. Otherwise it should be handled as any other water based product. SP-1100 may cause eye, skin and respiratory tract irritation by contact. Use only with adequate ventilation. Do not breathe vapors, especially in confined areas. Refer to the Material Safety Data Sheet for more information.

PACKAGING

SP-1100 is available in 55 gallon drums, totes or bulk.
