

WATERWELL STABILIZATION

Removable Wear Pad Stabilizer

Sleeve Stabilizer

Square Stabilizer

Piggy Back Stabilizer

Pony Collar

Sub

RWP - This tool provides 2-3 feet of wall contact. Pads can be replaced when worn out.

Sleeve - This tool provides 1-2 feet of wall contact. Sleeves can be replaced when worn out.

Square - This tool provides continuous wall contact. It can be ordered in 10' - 30' lengths.

Piggy Back - This tool provides 8" - 1 foot of wall contact. It is short and easy to handle.

Pony Collar - This tool can be used as a spacer to obtain the desired length or spacing of stabilizers.

Sub - This tool is used to cross-over from one connection to another.

Practical Use of Stabilization

Stabilizers can be ran individually or can be used in conjunction with pony collars in order to "build" a stabilizer of the desired length. Piggy-back stabilizers can be bored for a float, (dart valve), and ran between pipe or collars. All tools come with new connections and wrench flats as ordered.

Also available: Bits, Hammers, Hammer Shrouds, Roller Reamers, Cutrite Mills, Float Valves, Lift Bails, Handling Tools, Pipe Dope and Foamer.
